LED 1 BAR EXTENDER(GCL-ALAEB1-D)

KIT INCLUDES

- 1 x 50cm LED Bars
- 1 x 1m Power cable

- 3 x Nylon cable ties
- 3 x Velcro™ fasteners

- 2 x Metal mounts

USE AND SAFETY INSTRUCTIONS

Unpack the LED Bar and identify all components. The LED Bar is designed to mix and match with other OZtrail LED Strip Kits, LED Strip Extenders and accessories. Please note a maximum total length of 5m of LED Strip and LED Bar is recommended.

Position the LED Bar as required ensuring there are no kinks or tight bends in the power cables. Secure the Bar and cables using the metal mounts, nylon cable ties and Velcro™ fasteners.

Check the 12V plug is disconnected from the power source and the on/off dimmer control switch is turned fully in the anti-clockwise direction to the off position. Now connect the power cables and tighten the connectors fully to ensure a weather-proof seal. Connect the 12V plug into power source and turn the on/off dimmer control switch in the clockwise direction and the lights will come on and get brighter as you turn further in the clockwise direction.

To pack away, turn the on/off dimmer control switch fully in the anti-clockwise direction to the off position and disconnect the 12V plug from the power source. Unscrew power connectors and remove the metal mounts, nylon cable ties and Velcro™ fasteners.

Please note: The LED Bar, LED light strips, cables and connectors are weather-proof rated to IP66, however the on/off dimmer control switch and the 12V plug are not weather proof and should be protected from rain and any form of moisture. Always supervise children using this product and disconnect power when not in use.

CARE INSTRUCTIONS:
Use a damp sponge or cloth to remove marks. Allow to dry thoroughly. Never pack away damp, dirty or wet. Only a qualified electrician can service or repair this item.
